

PROFESSIONAL SUMMARY

Frontend Developer with 10+ years of experience building and maintaining internal systems using Next.js, React, and TypeScript.

Comfortable working as a fullstack developer with Node.js and PHP, contributing to both frontend and backend logic.

Skilled in automated testing (Playwright), CI/CD pipelines (GitLab, Docker, Kubernetes), and cross-functional collaboration in Agile environments (Scrum, AllHands).

Strong focus on clean code, user value, performance optimization, DevOps practices, and scalable architecture.

Passionate about continuous learning, knowledge sharing, and mentoring in technical teams.

CORE SKILLS

Front-end:

React, Next.js, Remix, Astro, TypeScript, JavaScript (ES6+), Tailwind CSS, SCSS, Styled Components, Material UI, Radix UI, Lexical, React Query, Zod, tRPC, Next-Intl

Back-end:

Node.js, Express.js, REST, GraphQL, PHP, WordPress (custom themes/plugins, Gutenberg), Payload CMS, Redis, MySQL, PostgreSQL, MongoDB, DocumentDB

Testing & Tooling:

Vitest, Playwright, Storybook, ESLint, Git, Docker, Turborepo, Testing Library

Integrations:

Google Tag Manager, Expona, eTrusted, Dofinder, Adyen, Facebook API, Cloudflare, Sentry

Other:

CI/CD, Domain and DNS configuration, Email setups, Microservices, Kubernetes, Solr, Web performance optimization

LANGUAGES:

Polish – Native, English – B2 (Upper-Intermediate)

OTHER INTERESTS

Experiments with ESP32 microcontrollers using Espressif IDF, programming in C for embedded systems and IoT prototypes

Runs a mini homelab based on Proxmox, hosting tools such as Grafana, Grafana K6, Wakapi, GlitchTip, n8n, SiteSpeed.io, Redis, and various databases for observability, automation, and experimentation. Most services are deployed using Docker Compose, with occasional use of Kubernetes for complex orchestration.

PROFESSIONAL EXPERIENCE

Front-end Developer

Artgeist sp. z o.o., Wrocław
September 2021 - July 2025 (3 years 11 months)

- Built and developed bimago.pl, an internal web platform using Next.js, React, and TypeScript
- Integrated and consumed RESTful APIs; used Payload CMS as a headless content management system
- Improved performance using React Server Components (RSC), reducing CPU and memory usage by 10-20%
- Applied clean code principles, component reusability, and design patterns for scalability and maintainability
- Wrote automated tests with Playwright and Vitest to ensure high code reliability
- Managed end-to-end CI/CD pipelines with GitLab, Docker, Kubernetes, and AWS deployments
- Participated in Scrum and Kanban ceremonies, technical planning, and code reviews
- Built modular and accessible UI components; integrated 3rd-party APIs (Exponea, Dofinder, Adyen, eTrusted)
- Collaborated with cross-functional Agile teams across product, QA, and engineering
- Previously developed and maintained Magento 1/2 front-end and back-end modules, including custom admin features and full platform migration

Tech Stack: Next.js, React, TypeScript, Tailwind, SCSS, Playwright, Vitest, GitLab CI, Docker, Kubernetes, AWS, Figma, Jira, Git, Payload CMS, REST API, PHP, MySQL, Magento 1/2

Full-stack Developer

Konceptika, Wrocław
July 2013 – August 2021 (8 years 2 months)

- Led end-to-end development of web applications, e-commerce platforms, editors, and games.
- Worked across frontend, backend, and server environments, ensuring high-quality, scalable code.
- Built apps using React, Redux, WordPress, PHP, and Firebase.
- Developed interactive tools using FabricJS, PixiJS, ThreeJS, BabylonJS, and integrated with social APIs (Facebook).
- Built custom plugins, REST APIs, GTM tags, and analytics integrations.

Tech Stack: React, Redux, WordPress, WooCommerce, PHP, SCSS, Tailwind, Styled Components, MySQL, GraphQL, Firebase, Docker, Git, FabricJS, PixiJS, BabylonJS, AnimeJS, GTM, Facebook API, GA

Freelance Web Developer

2006 – Present (18+ years)

- Delivered full-cycle web development services: planning, UI/UX, coding, deployment, and maintenance.
- Supported small businesses with custom WordPress, WooCommerce, Next.js, and Remix solutions.
- Managed hosting, DNS, Cloudflare, performance optimization, monitoring (Sentry, GlitchTip).
- Built 2D/3D games and hobby projects using BabylonJS, React, and Docker environments.

Tech Stack: WordPress, WooCommerce, PHP, Gutenberg, React, Remix, Astro, TypeScript, BabylonJS, Docker, Git, Cloudflare, GA, GTM, Sentry, GlitchTip
